Customer Problem Statements — Customer Care Registry

A well-articulated problem statement allows the team to find the ideal solution for the challenges customers and support staff face. The statements below are derived from the pain points identified in the Empathy Map for the Customer Care Registry application.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a customer with a service issue	get my complaint resolved quickly	I have to repeat my issue across multiple disconnected channels (phone, email, chat) with no visibility into its status	there is no single, unified place to raise and track a complaint	frustrated, unheard, and unsure whether my issue is even being worked on
PS-2	a support agent handling complaints	resolve customer issues efficiently on my first response	I don't have the customer's full interaction and complaint history in one view, and each complaint has to be manually categorized and prioritized	past interactions are scattered across channels and there is no automated categorization support	overwhelmed, slowed down, and more likely to give inconsistent or delayed resolutions
